Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

In Abstract, line 11. "Fig. 3" has been removed.

The Examiner's amendment has been made to put the abstract in a proper format in order to place the application in a condition for allowance.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach an internal planar antenna comprising a radiating plane including a first side and a second side longer than the first side, a short circuit conductor which connects the radiating plane to a ground plane at a short-circuit point located closer to an intersection of intersecting edges than to corresponding opposite edges wherein the ground plane including at least one non-conductive slot to improve matching of the antenna, starting point of the slot being located in one of the first and the second intersecting edges closer to the short-circuit point than to the opposite edges and the slot traveling substantially parallel to the long side of the radiating plane as defined in claims 1 and 12, or the ground plane including a second slot starting from the same edge of the ground plane as the first slot and traveling substantially parallel to the first slot, and a feed point being located between the first and the second slots on a circuit board as defined in claim 13. Therefore, claims 1-20 are presently allowed.
